NOISE ATTENUATING HEADSETS FOR AIRCRAFT GROUND SUPPORT

Model H3530

Most Major Airlines Use Model **H3530** for Ground Support Operations

David Clark Company's Model H3530 Noise Attenuating Headset is designed for use in ground support crew operations where background noise or distance makes communication extremely difficult. If safety and proven communication performance is a priority, *it should be your choice, too!*

SERIES 3800

AIRCRAFT DEICER COMMUNICATION SYSTEM

featuring NOISE-ATTENUATING HEADSETS with M-1/DC NOISE-CANCELING MICROPHONES

Series 3800 System is designed to solve the specific problem of communication during aircraft deicing, anti-icing and maintenance operations. It was engineered and tested in coordination with major airline ground equipment engineering personnel. Series 3800 is a rugged, reliable system for this special airline application.

HEARING PROTECTORS

OVER-THE-HEAD STYLE

MODEL 27
Deluxe Model with locknut headband assembly. The best ever made. Excellent attenuation, especially in low frequencies, with desired comfort. Soft foam cushion headpad, urethane covered ear seals and military quality materials, finish and workmanship. NRR:22

MODEL 10A
The most popular model. Excellent noise attenuation. Adjustable headband and stirrup assembly assures comfort and employee acceptance. NRR:23

MODEL 19A
Same design and quality as the 10A but with deeper domes for greater attenuation in the low frequencies. NRR:23

MODEL 9A/N/2
Similar to Model 19A, but manufactured to military specification, MIL-A-23899B.

VERSATILE "TRI-FIT" STYLE

MODEL 310
The best and most popular tri-fit style. The excellent attenuation and versatility makes this unit an excellent choice for your Hearing Conservation Program. NRR (over-the-head):20; NRR (under-the-chin):20
